

MAINLINE BAITS

# GIVE ALL THE RIGHT SIGNALS

**NEW FLUORO WAFTERS OUT NOW!**

Our new Fluoro Wafers as their name suggests, are super bright hookbaits that have been designed to create a 'critically-balanced' hookbait presentation by using the weight of the hook to counterbalance the slow sinking buoyancy of the hookbait. Making them easy to use, and the perfect hookbait for modern day rigs such as the Spinner Rig and German Rig.

Great for fishing in PVA bags or over a feed of other baits within the Dedicated range. Each proven flavour is available in **PINK**, **WHITE** and **YELLOW** colours as well as round and dumbbell shapes to match any fishing situation!
