

ATTRACTION THAT'S OFF THE SCALE.

Mainline Hookbait Enhancement Systems amplify the food signals coming from your hookbaits, so they stand out and get eaten quicker. That's because they embrace the same active ingredients from our boilies that make carp want to eat. Prolonged soaking in them will harden your baits, they're PVA friendly and a glug will boost any hookbait, boilie, pop-up, dumbbell etc. And they're from Mainline, so you know they work, all-year-round.

DON'T WASTE TIME, USE MAINLINE.

Mainline Hookbait Enhancement Systems are available to match all of our Dedicated Freezer Boilies and our new High Impact Range.
