

POWER UP!

When our consultants witnessed the carps' intense feeding reaction to **NEW POWER PARTICLES** they realised we had another monster on our hands. But how have we 'powered-up' your particles?.. Well, we treat every single seed, nut and pulse in the same way as we treat our boilies; so they're fresh, bursting with natural attraction and prepared to absolute perfection. They're activated by some of the most powerful, most proven attractors known and they are even **PVA Friendly**, giving you countless presentation options. If that's not enough, they'll stay fresh for 2 years if kept sealed, so there's no excuse for not keeping a jar or two in the barrow.

Do your fishing the power of good with **POWER PARTICLES**. In your local Mainline Bait Centre... **NOW!**
